# **Citizen driven science within trans-disciplinary research**

Tuesday 25th of September 2018  
Beyond RCT, Amsterdam

Sabine Wildevuur & Paulien Melis, Waag

# Why citizen driven research?

◀ PRACTICAL (USE) CONCEPTUAL (DISCUSS) ▶

# Definition trans-disciplinary

- “We are using the term ‘trans-disciplinary’ to identify **dynamic practices** that have recently developed through **creative co-production** between the **arts, sciences and humanities** – but also, crucially, practices that reach beyond academia **into society** more broadly.” (Welcome Trust, 2018)
- “Science is not art and art is not science [...]. By trespassing the boundaries of one’s discipline, the results could be new, trans-disciplinary knowledge and novel perspectives.” (Wildevuur, 2009)

---

# trans-disciplinary space

Bring together scientists, researchers, artists, designers and clinicians, with and without lived experience, to uncover new insights around the lives of people who live with ...
